

Nandi Resources Generation Technology Private Limited

Working towards a greener, happier future...

Nandi Resources Generation Technology Private Limited, an EnVERT group company, had a modest beginning in 2006 as a 'concept to commissioning' solar solutions provider. Over the years, from consulting companies on suitable solar technology, designing solar power plants, issuing Due-diligence reports to Owners and Lenders, conducting energy audits to creating awareness about renewable energy amongst people, we have done it all.

Grid Connected & Off-grid SPV System

- * Preparation of Prefeasibility and Detailed Project Report
- * Preparation of bankable project report and documentation for arranging project finance.
- * Site Selection and System Design
- * Project management
- * Operation and maintenance services

Solar Thermal

In solar thermal space we are planning to install around ten thousand sq.m. of collector area by 2022 for process heat requirements of residence and industry.

Carbon Advisory Services

We offer complete range of services from Concept to Sale of Certified Emission Reduction (CERs). From Identification of CER Assets to facilitating Verification process and issuance of CERs are offered by us.

Green Building Solution Services

We offer sustainable building solution in terms of resources, material and energy efficiency. We are actively involved in Green Building movement in India

Export Import Services

We are merchant exporters of agriculture products, apparels and fashion items, accessories and semi precious jewelry, handicrafts and gift items as well as industrial supplies of engineering goods and services.

Renewable Energy Solution

In line with India's National Action Plan on Climate Change the company is aimed at providing holistic solution in solar energy space. The company is promoted by a group of experts who have essentially gained the experience from the field. The inherent strength lies in hands on experience coupled with perfectionism from the employees of our company. We are focusing on grid connected and off grid projects including but not limited to projects of Jawaharlal Nehru National Solar Mission. Our consulting projects are for off-grid, grid tied and hybrid systems for Solar PV and Solar Thermal.

Energy Audit and Energy Management Services

Our second vertical banks upon the National Mission on Enhanced Energy Efficiency that mandates about 23 million tons oil-equivalent of fuel savings per year.

We help organizations achieve Energy Saving Certificates exercising Perform Achieve and Trade (PAT) philosophy. A syndicate of Certified Energy Auditors by Bureau of Energy Efficiency (BEE) works together in completing measureable and long term savings of energy.

SUSTAINABLE ENERGY REVIEW

Sustainable Energy Review is a one-of-a-kind magazine covering technology, industry, policy and finance for the entire spectrum of renewable energy technologies. The Magazine is targetted at companies involved directly in renewables, owners and managers of renewable energy sites, manufacturers of complete renewable energy systems, research and training establishments, consultants in renewable energy sector, decision makers in power generating utilities, local or central governments, energy advisory or planning agencies, aid agencies, small and large energy users and so on. The publishing frequency is 4 times per year.
